LASER TATTOO PAPER
FOR SKIN AND FLAT SURFACES

PRINT SETTINGS
• Image Mode: mirrored
• Media Setting: Multi-Purpose-Tray, 175g paper or heavier

PREPARATION
• Hold the paper at a slight angle in the light to recognize the coated side.
  Print your design in mirror image mode onto the coated side of the A-Paper.
• Use a white toner printer if you want to transfer on dark skin or dark surfaces or, if you want to use white color in the design.

A-PAPER
The printable side of the A-Paper is semi-matt.
The non-printable side is printed with our FOREVER-Logo.

B-PAPER – GLUE
The B-Paper has a matt and glossy side. The matt side is the backing paper and it will be disposed of after peeling it off from the foil.

1
Peel off a corner of the white backing paper from the B-Paper and fold it over.

2
Place the A-Paper face up on a flat surface. Now stick the exposed piece precisely on the corner of the A-Paper.

3

4

Use a squeegee, ruler or something similar and push the B-Paper backing paper away by rubbing over the B-Paper.
Now the glue is applied and the tattoo paper is ready for transfer.

5

6

7

TRANSFER
• Cut around the design as exact as possible, you can use a scissors or most cutters/plotters.
• Peel off the glossy foil.
• Position the tattoo face down on clean and dry skin.
• Soak the Tattoo with a dampened sponge until wet throughly. Apply light pressure to the tattoo.
• It is ready to be peeled off, when it can be slid away without using much force.

NOTE
• The tattoo has a high adhesive effect. Depending on the design and its size as well as where the tattoo is placed, the durability is about 2-4 days.
• If you wish to remove your tattoo earlier, you can simply use sticky tape / scotch tape or use skin oils and rub it off.
• If you like a more matte looking appearance, you can rub sun crème / Sun Screen carefully over your new tattoo.

Are you experiencing problems with this transfer paper?
Don’t panic, it does work.
